

# SOTS International Project Summary

Faroe Islands Training in  
Well Engineering

**SOTS**  
COURSE CENTRE

**Project name:** *Faroe Islands Training in Well Engineering*

**Client:** Statoil Faroes and Greenland

**Sponsors:** Statoil

**Project Manager and Project Coordinator:** Øystein Førsvoll and Kjell-David Blanchard

**Time period:** September to December 2011

**Place:** Stavanger Offshore Technical College

**Summary:** This project came about from a need to build up local expertise in well engineering on the Faroe Islands. Twelve participants from the Faroe Islands are to receive intensive specialized training over a period of 10 weeks at SOTS. Additional support is provided through full access to the Its-learning online system, and other learning aids.

Once they have completed the theoretical and practical training, they will sit final examinations in order to obtain OLF certification, which is based on internationally recognized Norwegian standards and requirements. These students will then have the skills, competence and qualifications to enter the world labor market more competitively.
