

SOTS International Project Summary

Training of Students
from Equatorial Guinea

SOTS
COURSE CENTER

Project name: Training of Students from Equatorial Guinea

Project participants: Vetco Aibel, ABB Offshore Systems, RKK and SOTS

Sponsor: ABB Offshore Systems

Time period: 2005

Place: Stavanger Offshore Technical College

Summary: ABB Offshore Systems operates an industrial processing plant on board the ship Sendje Berge off the coast of Equatorial Guinea. The agreement reached between ABB and SOTS concerned the education of locally employed personnel from Equatorial Guinea within the area of industrial processes on board Sendje Berge. This project was designed to:

- combine theoretical training and on-the-job-training on board Sendje Berge;
- provide students with practical and theoretical competence which will make them qualified for their demanding work as industrial process operators.

Participants completed their apprenticeships and attained their Norwegian educational certificates. SOTS continues to accompany Norwegian companies abroad in offering continuous training in skills and competence development.
