Ventspils 4.vidusskola, Latvia

Escola Básica 1,2,3/PE Bartolomeu Perestrelo, Madeira

Outline:

This project aims to improve pupils' motivation to read with the aim of increasing their school success, satisfaction and personal development and decrease the level of early school leaving. During the project partners will develop, promote, and disseminate educational best practices, including new teaching methods and materials to enrich the quality of reading literacy. It actively involves all key players in the education process to make aware the importance of reading. The project aims to develop skills like creativity, critical thinking, social-communicational skills, digital literacy, critical reading, and problem-solving skills. There are mobilities in which pupils will have the opportunity to visit partner countries and learn firsthand of other reading practices in inter-cultural exchanges.
